

Standard Annual Administrative Report (AAR)

Changes to the Standard AAR Effect Data Collected During the 1998 Reporting Period.

The use of the Modified AAR will be discontinued with the collection of data for the 1998 reporting period.

These FILE SPECIFICATIONS for the Standard AAR reflect the 1997 OMB-approved changes to the data set. In addition to adding and deleting entire data elements, the changes to the data elements also include changes to the data element's type, name and code. The changes are indicated in the column "Change" in the following chart. A technical note: "deleted" variables are only "discontinued" variables. This means previously collected data remains intact using the original variable names (for historical data analysis and other data uses).

The first four columns of the data element chart below represent the existing Standard AAR. This structure should be used for the collection and reporting of 1997 Standard AAR data. The last four columns of the chart show the types of changes and specific changes to the data elements that should be used for the collection and reporting of 1998 Standard AAR data.

As a result of this change, four elements collected in the Standard AAR have been expanded to capture data formerly collected by the Modified AAR. "Provider type," "Ownership status," "Minority board members," and "Type of agency completing this report" have been changed to collect the number of providers in each category included in the report. "Type of agency completing this report" taken from the Modified is for grantees completing the Standard AAR for multiple fee-for-service providers (each receiving less than \$10,000 in annual funding) to indicate their grantee category: Title I, Title II, or Title III. Note: the data reported by grantees on multiple providers must have a scope of "funded" clients since fee-for-service providers by definition report only on "funded" clients and services.

Providers completing the Standard AAR select "1" for "provider" for "Type of agency completing this report." In the category that describes their ownership status and minority board membership, the appropriate response for service providers is the numeral 1 in the relevant category. Grantees completing the Standard AAR for multiple fee-for-service providers (each receiving less than \$10,000 in annual funding) will enter the number of providers included in the report in each category.

HOW TO USE THE FOLLOWING TABLE

The following table shows the complete file specifications for the Standard AAR. Column 1 includes both existing variable names and new variable names. If a change has occurred to the data element as a result of the OMB- approved modifications, the "Change" column reflects that activity specifically if the data element was added, modified, or deleted.

The first column shows the list of data elements in the Standard AAR data file, including new data elements. The second, third, and fourth columns show the data elements of the Standard AAR for the 1997 AAR reporting period. The OMB-approved modifications to the data set are in the last four columns. These changes are in effect beginning with data collected in 1998 and reported in 1999. The "Change" column indicates the activity for the data element: addition, deletion, or modification. If the data element is impacted by partial change, the "type," "name," or "code" columns under the "Change" are indicated in the relevant column.
